

## ATRAS NETWORK COMMUNICATIONS

is a subsidiary of ATRAS NETCOM which owns and operates manufacturing plants in Taiwan, Malaysia, and China, with a new 350,000 square foot factory that opened in Shanghai, China in June, 2005. We have been manufacturing products for over 20 years for various industries including the CATV industry, Satellite TV broadcast industry, Security and CCTV industry and the Voice and Data communications industries. All of our manufacturing facilities are ISO 9001 certified. ATRAS NETCOM factories are vertically integrated operations, with in-house extrusion, tooling, injection molding, casting, coating, plating and secondary machining capabilities.

Through LANTEK ELECTRONICS, another subsidiary, ATRAS NETWORK COMMUNICATIONS offers RF electronics for the North American CATV and Satellite TV industries. Lantek has very unique capabilities to manufacture high quality, high volume, UL listed RF devices that comply with SCTE and other industry guidelines. The product offering includes the ATRAS brand, plus several OEM branded products with well-known US corporations.

ATRAS NETWORK COMMUNICATIONS also provides structured voice and data connectivity products to support the North American communications industry. All of our products are approved by UL, cUL, and CSA. All ATRAS NETCOM jacks, faceplates, inserts, and panels comply with TIA/EIA-568B.2 standards for Voice, Category 3, Category 5E and Category 6 specifications requirements.

Through ATRAS NETCOM we can also provide quality low voltage wire and cable for many applications including sound, security, HVAC, fire, CCTV, CATV, and voice & data for commercial and residential wiring. All cable products are UL, cUL, CSA, or ETL listed to the appropriate standards and requirements of the low voltage cabling industry.
